

MNBS of Loughborough – Awards Citation

MNBS of Loughborough is recognized as an excellent safety solutions service provider that begins with an understanding of our clients' workplace health and safety requirements and aspirations, and then nurtures them with a flexible yet professional approach.

At MNBS, workplace safety is a passion, applying our experience and knowledge to help clients complete risk assessments, develop policy, obtain industry-recognised accreditation, undertake site inspection, conduct occupational health surveillance, complete PQQ's, run company-wide campaigns etc.

We are accessible and pro-active, and visit sites all over the UK to ensure business activities are safe – we do not just sit at the end of a telephone prescribing remedies. Trust and a deep respect for confidentiality is the basis of excellent relations with our clients.

Furthermore, as we live in an age where people are interested in healthy living, MNBS fully understand that people are constantly torn between the pressures of work and personal life. We therefore add a personal touch to a serious subject by consistently looking for new and exciting ways to engage workers, at the same time helping them achieve a healthy work-life balance.

Plus, MNBS is an advocate of modern technology, such as the use of drones in high-hazard activity and advances in IT to help improve health and safety management.

MNBS of Loughborough: a great example of how a safety solutions provider is committed to meeting the needs of employers and employees while providing the best service possible.
